Restriction Requirement

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-86, drawn to a regulated fluid system including a filter, classified in class 137, subclass 544+.
 - II. Claims 87-96, drawn to a method of providing breathable air in a regulated fluid system to be "...breathed by a human...", classified in class 128, subclass 205.24+.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions of the claims of Groups II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because combination is a regulated system breathed by a human. The subcombination has separate utility such as regulated fluid system which could be used in a regulated fluid system not breathed by a human 9i.e., a chemical processing system.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3753

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
